Python • Django • Flask • Java • Spring Boot • C++

MySQL • Postgres • SQLite • MongoDB

Git • Powershell • Command Prompt • Terminal AWS •

Azure • Google Cloud

REST APIs • OOP • Data Structures • Agile Development • DevOps

Work History

Web Transfer Tool

ADT Command Project, Javascript • Node.JS

henryqbonilla.github.io

Techs carry inventory and consistently need to email the warehouse handler to request to transfer parts between each other. The Web Transfer Tool allows techs to sign in and restrictively choose who and what to transfer to each other. Approvals must be applied between techs so that the warehouse handler can transfer on their end.

StudyBud

Freelance Fiverr, Python • Django • HTML

henryqbonilla.github.io

A website made for anyone looking to collaborate, learn and help each other for any types of topics. Using Django Framework, a combination of Python, HTML, Javascript and SQLite database intergration are applied to provide an efficient Model-View-Template structure to the website.

To-Do List Mobile

Freelance - Fiverr, Django • Python • JavaScript

henryqbonilla.github.io

A client was needing a mobile todo List that could be accessible from any device and any browser. Hence using the Model-View-Template structure consisting of HTML, CSS, Javascript and python, the client is able to login from anywhere and maintain their to-do list on the go.
